About Us

Cabinets. Counters. Components.

Samms was created to simplify the way you design and build interiors. Whether you're renovating a kitchen, fitting out a bathroom, or working on a larger residential project, our goal is to make high-quality components more accessible – without compromising on style or performance.

Our carefully curated range includes flat-pack kitchens, premium worktops, storage solutions, internal doors, handles, lighting, and more. Every product is selected with a focus on durability, design, and value.

For years, we've worked behind the scenes with leading kitchen manufacturers. Now, through our retail stores and online platform, we offer the same trusted products directly to homeowners, designers, and trade professionals.

With Samms, there's no need to choose between quality and convenience. We bring everything together – ready to assemble, ready to install, and ready to last.

Surfaces

Natural Stone

No two slabs are ever the same — and that's exactly the point.

Our natural stone collection brings character and authenticity to any space. From the soft veining of classic marbles to the rugged elegance of quartzites and the enduring strength of granite, these surfaces are sourced for their beauty and performance.

Each slab is hand-selected and available cut to size with short lead times. Whether you're looking for quiet luxury or dramatic contrast, natural stone remains the definitive choice for projects where individuality matters.

Quartz

Quartz offers the perfect middle ground between natural aesthetics and everyday practicality. Engineered for consistency and durability, quartz surfaces are non-porous, stain-resistant, and available in a wide range of finishes — from soft neutrals to bold marbled patterns.

Ideal for kitchens, vanities, and utility areas, our quartz range is selected for colour stability, reliability, and ease of maintenance. It is the go-to choice for those who want the look of stone without the upkeep.

Sintered Porcelain

Sintered porcelain surfaces are engineered to meet the highest demands of modern living. Heat-resistant, non-porous, UV-stable, and virtually maintenance-free, these ultra-compact slabs are ideal for kitchens, bathrooms, outdoor areas, and even bespoke furniture pieces.

Among the leading products in this category is Xtone by Porcelanosa — a premium surface known for its durability, refined finishes, and lifelike reproduction of natural materials. We stock a curated selection of Xtone, alongside other trusted porcelain brands that meet our standards for design and performance.

If you're looking for a surface that offers the beauty of natural stone with the resilience of engineered material, sintered porcelain is the ultimate choice — versatile, hygienic, and built to last.

Door Frontals

The choice of door frontal sets the tone for any interior — influencing not only how a space looks, but how it feels to the touch and performs over time. This collection brings together premium finishes, versatile substrates, and a wide design spectrum suited to kitchens, wardrobes, vanities, and more.

Acrylics — Gloss & Matte

Sleek, clean, and highly contemporary, our acrylic range includes both high-gloss and super-matte finishes. Products like Rehau Crystal, Brilliant Acrylic, and Metal Decor offer exceptional surface quality, scratch resistance, and a refined modern look — whether you're after glass-like shine or a smooth, low-sheen aesthetic.

Textured & Decorative Boards

Sourced from leading European manufacturers, our textured boards offer rich grain structures and architectural surfaces with both visual depth and tactile appeal. Perfect for creating feature panels or adding warmth and materiality to modern cabinetry schemes.

Veneers

Our veneer selection spans from natural African wild-grain timbers to engineered and designer Italian veneers. This includes unique finishes such as sawn, smoked, and embossed natural veneers — each chosen for its authenticity, depth of tone, and timeless appeal.

Black MDF

High-density and pigment-saturated, black MDF offers a bold, modern alternative for open shelving, internal detail work, and minimalist cabinetry. Its smooth, uniform core makes it a favourite among designers looking for seamless, edge-free finishes.

High-Pressure Laminates (HPL)

Engineered for strength and versatility, our HPL collection includes a wide variety of solid colours, woodgrains, and textured patterns. These laminates are ideal for high-use areas where impact and moisture resistance are key — offering both aesthetic range and long-term durability.

Moisture-Resistant Substrates

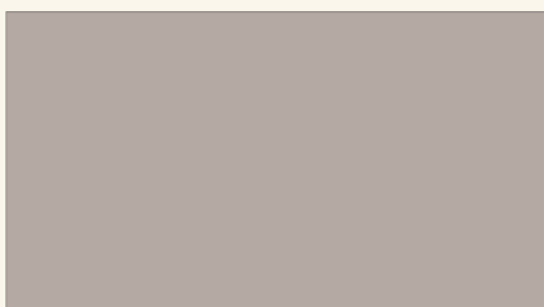

For cabinetry in bathrooms, kitchens, or sculleries, our moisture-resistant boards are specifically selected for their structural stability in humid environments. Compatible with all major finishes, they provide a dependable base where durability is non-negotiable.

Storage & Organisation

A kitchen is only as good as the way it works. That's why we've curated a specialised range of fittings and internal accessories that enhance both the function and feel of your cabinetry.

Italiana Ferramenta – Functional Hardware, Refined Design

Engineered in Italy, Italiana Ferramenta fittings are known for their precision, innovation, and clean aesthetics. From shelf supports and brackets to folding mechanisms and concealed hardware, these components offer both structural integrity and subtle sophistication — helping designers and installers achieve flawless finishes and lasting performance.

Sige – Premium Internal Storage

Made in Italy, Sige accessories bring structure and ease to the modern kitchen. Our range includes pull-out pantries, corner units, under-sink organisers, and drawer inserts — all designed for smooth motion, high weight capacity, and intuitive everyday use.

With elegant finishes like chrome, graphite, and soft-close runners throughout, Sige products allow you to maximise storage without compromising on design.

Appliances

Our appliance range brings together select European brands that prioritise innovation, longevity, and aesthetics. From state-of-the-art extraction and cooking to advanced food preservation, every product we offer is chosen to meet the needs of design-conscious homeowners and demanding interior professionals.

Falmec – Extraction & Cooking

Made in Italy, Falmec is a leader in kitchen ventilation and cooking technology — combining elegant design with breakthrough engineering.

Cooker Hoods

From slimline integrated hoods to powerful island extractors, Falmec offers some of the most advanced and visually refined cooker hoods available today. Featuring technologies like E.ion®, Circle.Tech, and Noise Reduction System, these systems quietly and efficiently improve air quality while enhancing the overall kitchen environment.

Hobs

Falmec's growing hob collection includes high-performance gas and induction options with sleek surfaces, intuitive control, and Italian design at its core. Perfectly matched with Falmec extraction, these hobs offer a seamless and elevated cooking experience.

Liebherr – Refrigeration

Renowned for precision engineering and long-term reliability, Liebherr refrigerators are built to preserve food at optimal conditions with minimal energy use.

Our curated selection of Liebherr fridges includes premium models known for their clean design, quiet operation, and innovative features — such as BioFresh compartments and dual cooling systems — making them ideal for high-spec kitchens that demand both function and form.

LIEBHERR

FRIDGE - FREEZER

LIEBHERR

Model Number: ICBN 3356

177 cm x 55.9 cm x 54.5 cm

R39 900

INC. VAT

The BioCool-Box allows regulation of the humidity level within the fridge compartment so that food keeps fresh for longer. It is convenient to use and ensures stored food is clearly visible.

The NoFrost system from Liebherr provides rapid, fan-assisted, frost-free freezing for the safe, long-term storage of food. The NoFrost technology creates a much larger storage capacity and keeps the freezer constantly frost-free to make defrosting a thing of the past.

Accurate and independent temperature control of the fridge and freezer compartments is facilitated by DuoCooling: two separately adjustable cooling circuits. No air exchange between the fridge and freezer compartment, so that odours cannot be transferred and the stored food is prevented from drying out.

Drawers mounted on telescopic rails

The drawers extend on smooth-running telescopic rails and can be conveniently removed at a door angle opening of 90°.

GlassLine door interior with VarioBoxes

The GlassLine door shelves feature a satin-finished safety glass base, elegantly shaped plastic edging, stainless steel trims, as well as bottle and jar storage with adjustable holders for extra safety. The two removable VarioBoxes are perfect for sorting and storing smaller items in a clearly visible manner.

A drawer stop ensures that the VarioBoxes are secure and that they are not dislodged when items are accessed.
